PLEASE NOTE: This is the final version of this sound library. Updated: January 22, 2013

Presenting the final release version of **Bullets HD Pro Sound Effects Library**. After nine months and over thirty recording sessions it's finally done! This release adds Set 4 to the collection and includes sounds of bullets being shot into a old Bronco SUV. They were recorded inside and out... and from all sides. After many weather delays and scheduling conflicts the end is here. During the last week of October the remaining sounds for this comprehensive collection of bullet sound effects were recorded with a multi-microphone setup in the wilds of North Idaho.
